

ADVICE OF WHO

03/02/2020 - 18:51

Hungarian National Police Headquarters Communication Service

Please note the advice of the World Health Organization (WHO) on measures to prevent coronavirus

Advice of WHO to prevent novel coronavirus (2019-nCoV) that causes pneumonia: **practice general hygiene and food security measures!**

- wash your hands frequently with an alcohol-based hand rub or soap and water;
- when coughing and sneezing, use a tissue – and clean your hands thoroughly afterwards;
- avoid close contact with people suffering from a fever;
- if you have a fever seek medical care early and share previous travel history;
- avoid live animal or animal product markets in territories where the novel coronavirus is already established;
- avoid consumption of raw or undercooked animal products.

The 06-80-277-455 and 06-80-277-456 free hotlines, created by the [National Center for Public Health](#), are available 24 hours a day, seven days a week from mobile and landlines. Professionals on the lines provide information about the coronavirus.
